

TO REMOVE THE LEGS FROM THE DRAWER, FIRST REMOVE THE DRAWER FROM THE CASE.

1. Under the drawer are two levers.
2. Press both levers outward while pulling the drawer out and off its slides.
3. Keep the drawer out until the legs are installed (see assembly instructions).

Nathan Hunter

Monterey Nightstand and End Table Assembly

TO INSTALL THE LEGS:

1. Place the case on its back with the opening pointing up.
2. Attach the legs by inserting the screws (with washers) through the holes in the bottom of the case body and threading them into the inserts in the legs. Keep each screw a little loose until all of the screws have been threaded into each leg. Then tighten all of the screws firmly using the hex key supplied.

PRO TIP:

Jiggle the hex key back and forth as you screw in the screws. This will help the threads align and prevent binding.

TO RE-INSTALL THE DRAWER:

1. Set the piece upright.
2. Pull the slides out.
3. Place the drawer onto the slides, aligning it to the slides.
4. Slide the drawer back into the case until you hear the slides click into place. If properly aligned to the slides, the drawer should slide easily into the case without resistance until the last push to click.
